

INTERNATIONAL SOCIETY OF SUGAR CANE TECHNOLOGISTS

SECOND ANNOUNCEMENT

MANAGEMENT COMMISSION WORKSHOP TUCUMAN, ARGENTINA

September 2019

The original focus of the proposed workshop has changed considerably. It will include a facilitated panel discussion on a selection of posters and papers aligned with the following theme:

FROM AGRO-ECOLOGY TO AGRO-ECONOMICS: FRAMEWORKS FOR SUSTAINABLE PRODUCTION

The Management Commission Workshop will take place during one of the sessions during the ISSCT XXX Congress.

It will provide opportunities for delegates to engage with a range of practices that have been developed and implemented in sugarcane industries, to address the ever-changing landscapes in which they operate.

The programme for the workshop will be included in the Congress programme, once it has been finalised.

Workshop Format

The programme will comprise a single session, in which five short presentations will be given. This will be followed by a panel discussion that will encourage delegates to outline programmes and approaches in their industries that have been developed to address agro-economic challenges, and reflect on the manner in which they have been structured and managed to facilitate success.
