VOLUME II

AUTHOR INDEX

AH KOON, P.D., TEELUCK, M. and RATNA, R.D.
A Development of a multipurpose cultivator for use in sugarcane
AKACHI, T., MIYAHIRA, M., KURAMOTO, K., SYODA, M. and MORITA, T.
Characterisation of quantitative trait loci (QTLs) contributing to field resistance to yellow spot disease in sugarcane
AL-JANABI, S.M., PARMESSUR, Y., KROSS, H., DHAYAN, S., SAUMTALLY, S. and DOOKUN-SAUMTALLY, A.
New, and older, techniques in pest management: a review of the 2003 Entomology Workshop
ALLSOPP, P.G., GANESHAN, S., SALAZAR, J., SUASA-ARD, W., WHITE, W.H. and FALLOON, T.R.
Estimating costs of handling sugarcane trash for use as boiler fuel
AMÚ, L.G., BRICEÑO, C.O., MORENO, E. and GÓMEZ, A.L.
Genomic analysis of transgenic sugarcane (Saccharum spp.) populations: another link between biotechnology and breeding
ARENCIBIA, A.D., CORNIDE, M.T., CARMONA, E., CASTIGLIONE, S. and SALA, F.
Antixenosis resistance in sugarcane to the stem borer Sesamia nonagrioides (Lefebvre) (Lepidoptera: Noctuidae)
AVRAM, P., MORGENROTH, B. and SEEMANN, F.
Benchmarking concept for an integrated sugar, ethanol and co-generation plant
BADALOO, M.G.H., RAMDOYAL, K. and NAYAMUTH, A.R.H.
Variation and inheritance of sucrose accumulation patterns and related agronomic traits in sugarcane families
BAPPEL, E., BÉGUÉ, A., DEGENNE, P., LIEBOURGEOIS, V. and SIEGMUND, B.
Real-time sugarcane harvest monitoring using SPOT 4&5 satellite data
BAPPEL, E., BÉGUÉ, A., MARTINÉ, J.F., PELLEGRINO, A. and SIEGMUND, B.
Assimilation of a biophysical parameter estimated by remote sensing using SPOT 4&5 data into a sugarcane yield forecasting model
BEATTIE, R. RAYMENT, G. and GREEN, B.
Improving water quality in NSW cane drains by monitoring and grower participation
BEATTIE, R.N., QUIRK, R.G., NIELSEN, P.J., RAYMENT, G.E., AITKEN, R.L and McGUIRE, P.J.
Achieving self-regulation for drain maintenance in the New South Wales sugar industry
BERDING, N.
Back to the future: a review of the 7th ISSCT Breeding and Germplasm Workshop
BERDING, N.
Poor and variable flowering in tropical sugarcane improvement programs: diagnosis and resolution of a major breeding impediment

Irrigation of sugar cane: from research to field practice

Biotechnology continues to move closer to wide-scale application in the industry: the IVth Molecular Biology Workshop, held at CIRAD, Montpellier, France

Breeding sugarcane for leaf scald resistance: a genetic study

Modified sequential selection in sugarcane

The impact of molecular marker and genetic map information on breeding and selection strategies

Molecular breeding of sugarcane using DNA markers and linkage disequilibrium mapping

Morphological and agronomic evaluation of 220 clones in the Ecuadorian sugarcane collection

Promising sugarcane clones for tropical conditions of Ecuador: first group of selections

Technical and economical alternatives for future sugarcane irrigation in the Guatemalan area

Detection of *Sugarcane Streak Mosaic Virus* in sugarcane from several Asian countries

Realtime dewpoint temperature improves evapotranspiration estimates and crop model performance

*Sugarcane Yellow Leaf Virus* in the world collection of sugarcane and related grasses at Miami, Florida

Field design for green cane harvesting in Colombia

A molecular approach to breeding for sternborer resistance in sugarcane

Epiphytic colonisation and infection by *Xanthomonas albilineans* of two sugarcane cultivars differing in resistance to leaf scald disease

Progress with mechanising field operations in the Guyana sugar industry

An investigation of the feeding characteristics of the forward-feeding zone of chopper harvesters: development of a research harvester

Optimising machine component layout for enhanced harvester feeding performance in lodged crops

An efficient tool for managing the sugarcane quarantine in Cuba: CUARENT for Windows version 2.5

Comparison of five isolates of sugarcane brown rust and differential reaction on six sugarcane clones

Preliminary results of managed initiation of sugarcane flowering under tropical conditions of Ecuador

Effect of lodging on growth, yield and cane quality of sugarcane varieties grown in Brazil

Sugarcane cultivar identification using remote sensing data

Identification of weed-infested areas in sugarcane fields using satellite images

Early-season predictions of sugarcane yield in Florida, USA

Forecasting South Africa’s sugarcane crop with the Canesim crop model

Effect of phosphorus on physiological and agronomic parameters of sugarcane cultivars in Thailand

Molecular genetic diversity of sugarcane genotypes of subtropical India: SSCP-PCR analysis of simple sequence repeats

Sugarcane woolly aphid, *Ceratovacuna lanigera* Zehntner (Hemiptera: Aphididae) and its natural enemies in Thailand

Effects of soil solarisation, bagasse amendment and fungicide on *Fusarium* populations and weed control in sugarcane fields

Sugarcane Cytospora sheath rot in Iran

The feature of root growth and activity of a high yielding interspecific hybrid between *Saccharum* hybrid and *S. spontaneum* L

Soil compaction due to mechanical harvesting in wet soil

Combined applications of NIR, RS, and GIS for sustainable sugarcane production

Challenges of post-harvest residue management in the Louisiana sugarcane industry

Resistance to *Sugarcane Yellow Leaf* virus in Colombia

Attitudes to genetic engineering among sugarcane industry stakeholders in Australia
